CONTENTS OF VOLUME 11

Special Invited Papers

KAIMANOVICH, V. A. AND VERSHIK, A. M. Random walks on discrete groups: boundary and entropy 457–490

VERSHIK, A. M. AND KAIMANOVICH, V. A. Random walks on discrete groups: boundary and entropy 457–490

Articles and Short Communications

ALDOUS, DAVID. Minimization algorithms and random walk on the d-cube 403–413

ALPERN, STEVE. Rotational representations of stochastic matrices .. 789–794

ARRATIA, RICHARD. Site recurrence for annihilating random walks on Z_d 706–713

ARRATIA, RICHARD. The motion of a tagged particle in the simple symmetric exclusion system on Z 362–373

BASS, R. F. AND CRANSTON, M. Brownian motion with lower class moving boundaries which grow faster than $t^{1/2}$ 34–39

BASS, R. F. AND CRANSTON, M. Exit times for symmetric stable processes in R^n 578–588

BERBEE, HENRY. A bound on the size of point clusters of a random walk with stationary increments 414–418

BERGER, MARC A. A remark on stochastic fundamental matrices .. 215–216

BERMAN, SIMEON M. Sojourns of stationary processes in rare sets .. 847–866

BHATTACHARYA, R. N. AND PURI, M. L. On the order of magnitude of cumulants of Von Mises functionals and related statistics 346–354

BICKEL, PETER J. AND BREIMAN, LEO. Sums of functions of nearest neighbor distances, moment bounds, limit theorems and a goodness of fit test 185–214

BLUMENTHAL, R. M. Weak convergence to Brownian excursion ... 798–800

BOLAND, PHILIP J. AND PROSCHAN, FRANK. The reliability of k out of n systems 760–764

BREIMAN, LEO AND BICKEL, PETER J. Sums of functions of nearest neighbor distances, moment bounds, limit theorems and a goodness of fit test 185–214

BROWN, MARK. Approximating IMRL distributions by exponential distributions, with applications to first passage times 419–427

BROWN, MARK AND CHAGANTY, NARASINGA R. On the first passage time distribution for a class of Markov chains 1000–1008

BROWN, TIMOTHY C. Some Poisson approximations using compensators 726–744

BROWN, TIMOTHY C. AND KUPKA, JOSEPH. Ramsey's theorem and Poisson random measures 904–908

BYCZKOWSKI, T. AND HULANICKI, A. Gaussian measure of normal subgroups 685–691

CALHOUN, C. A. AND TAYLOR, R. L. On the almost sure convergence of randomly weighted sums of random elements 795–797

CARLSSON, HASSE. Remainder term estimates of the renewal function 143–157
CARMONA, RENÉ AND KLEIN, ABEL. Exponential moments for hitting times of uniformly ergodic Markov processes 648–655
CHAGANTY, NARASINGA R. AND BROWN, MARK. On the first passage time distribution for a class of Markov chains 1000–1008
COX, DAVID C. AND KEMPERMAN, J. H. B. Sharp bounds on the absolute moments of a sum of two I.I.D. random variables 765–771
COX, J. THEODORE, AND GRIFFEATH, DAVID. Occupation time limit theorems for the voter model 876–893
CRANSTON, M. AND BASS, R. F. Brownian motion with lower class moving boundaries which grow faster than $t^{1/2}$ 34–39
CRANSTON, M. AND BASS, R. F. Exit times for symmetric stable processes in R^n 578–588
CSÁKI, E., CSÖRGŐ, M., FÖLDES, A., AND RÉVÉSZ, P. How big are the increments of the local time of a Wiener process? 593–608
CSÖRGŐ, M., FÖLDES, A., RÉVÉSZ, P., AND CSÁKI, E. How big are the increments of the local time of a Wiener process? 593–608
DARLING, D. A. On the supremum of a certain Gaussian process .. 803–806
DAVIS, RICHARD A. Stable limits for partial sums of dependent random variables 262–269
DE ACOSTA, ALEJANDRO. A new proof of the Hartman-Wintner law of the iterated logarithm 270–276
DE ACOSTA, ALEJANDRO. Small deviations in the functional central limit theorem with applications to functional laws of the iterated logarithm 78–101
DE ACOSTA, A. AND KUELBS, J. Some results on the cluster set $C(\{S_n/a_n\})$ and the LIL 102–122
DERRIENNIC, YVES. Un theoreme ergodique presque sous-additif .. 669–677
DURRETT, RICHARD AND GRIFFEATH, DAVID. Supercritical contact processes on Z 1–15
EMERY, M., STRICKER, C. AND YAN, J. A. Valeurs prises par les martingales locales continues a un instant donné 635–641
FILL, JAMES ALLEN. Convergence rates related to the strong law of large numbers 123–142
FÖLDES, A., RÉVÉSZ, P., CSÁKI, E. AND CSÖRGŐ, M. How big are the increments of the local time of a Wiener process? 593–608
GINÉ, EVARIST AND MARCUS, MICHAEL B. The central limit theorem for stochastic integrals with respect to Lévy processes 58–77
GOLDBERG, S. I. AND MUELLER, C. Brownian motion, geometry, and generalizations of Picard's little theorem 833–846
GOROSTIZA, LUIS G. High density limit theorems for infinite systems of unscaled branching Brownian motions 374–392
GREENWOOD, PRISCILLA AND PERKINS, EDWIN. A conditioned limit theorem for random walk and Brownian local time on square root boundaries 227–261
GRIFFEATH, DAVID. The binary contact path process 692–705
GRIFFEATH, DAVID AND COX, J. THEODORE. Occupation time limit

theorems for the voter model 876–893
GRIFFEATH, DAVID AND DURRETT, RICHARD. Supercritical contact processes on Z 1–15
GRIFFIN, PHILIP S. An integral test for the rate of escape of d-dimensional random walk 953–961
GRIFFIN, PHILIP S. Probability estimates for the small deviations of d-dimensional random walk 939–952
GROENEBOOM, PIET. The concave majorant of Brownian motion ... 1016–1027
GROENEBOOM, PIET AND PYKE, RONALD. Asymptotic normality of statistics based on the convex minorants of empirical distribution functions 328–345
GUT, ALLAN. Strong laws for independent identically distributed random variables indexed by a sector 569–577
HAGWOOD, CHARLES AND TEICHER, HENRY. A multidimensional CLT for maxima of normed sums 1048–1050
HAHN, MARJORIE G., HAHN, PETER AND KLASS, MICHAEL J. Pointwise translation of the Radon transform and the general central limit problem 277–301
HAHN, PETER, KLASS, MICHAEL J. AND HAHN, MARJORIE G. Pointwise translation of the Radon transform and the general central limit problem 277–301
HALL, PETER. Chi squared approximations to the distribution of a sum of independent random variables 1028–1036
HALL, PETER. Sets which determine the rate of convergence in the central limit theorem 355–361
HANSON, D. L. AND RUSSO, RALPH P. Some more results on increments of the Wiener process 1009–1015
HANSON, D. L. AND RUSSO, RALPH P. Some results on increments of the Wiener process with applications to lag sums of I.I.D. random variables 609–623
HENDRICKS, W. J. A uniform lower bound for Hausdorff dimension for transient symmetric Lévy processes 589–592
HERRNDORF, NORBERT. Stationary strongly mixing sequences not satisfying the central limit theorem 809–813
HILL, THEODORE P. AND PESTIEN, VICTOR C. The advantage of using non-measurable stop rules 422–450
HOLGATE, P. The natural boundary problem for random power series with degenerate tail fields 814–816
HUDSON, WILLIAM N., MASON, J. DAVID AND VEEH, JERRY ALAN. The domain of normal attraction of an operator-stable law 178–184
HULANICKI, A. AND BYCZKOWSKI, T. Gaussian measure of normal subgroups 685–691
JAIN, NARESH C. AND MONRAD, DITLEV. Gaussian measures in B_p . 46–57
JANSON, SVANTE. Limit theorems for certain branching random walks on compact groups and homogeneous spaces 909–930
JANSON, SVANTE. Renewal theory for m-dependent variables 558–568
JOAG-DEV, KUMAR. Independence via uncorrelatedness under certain

dependence structures 1037–1041
JOAG-DEV, KUMAR, PERLMAN, MICHAEL D. AND PITT, LOREN D. Association of normal random variables and Slepian's inequality 451–455
JOHNSON, B. MCK. AND KILLEEN, T. An explicit formula for the C.D.F. of the L_1 norm of the Brownian bridge 807–808
KALLIANPUR, G. AND RAMACHANDRAN, D. On the splicing of measures 819–822
KEMPERMAN, J. H. B. AND COX, D. C. Sharp bounds on the absolute moments of a sum of two I.I.D. random variables 765–771
KILLEEN, T. AND JOHNSON, B. MCK. An explicit formula for the C.D.F. of the L_1 norm of the Brownian bridge 807–808
KLASS, MICHAEL J. On the maximum of a random walk with small negative drift 491–505
KLASS, MICHAEL J., HAHN, MARJORIE G. AND HAHN, PETER. Pointwise translation of the Radon transform and the general central limit problem 277–301
KLEIN, ABEL AND CARMONA, RENÉ. Exponential moments for hitting times of uniformly ergodic Markov processes 648–655
KUELBS, J. AND DE ACOSTA, A. Some results on the cluster set $C(\{S_n/a_n\})$ and the LIL 102–122
KUELBS, J. AND ZINN, J. Some results on LIL behavior 506–557
KUPKA, JOSEPH AND BROWN, TIMOTHY C. Ramsey's theorem and Poisson random measures 904–908
KUSOLITSCH, N. AND NEMETZ, T. A method of investigating the longest paths in certain random graphs 217–221
LAWLER, G. F. AND VANDERBEI, R. J. Markov strategies for optimal control problems indexed by a partially ordered set 642–647
LIGGETT, THOMAS M. Attractive nearest particle systems 16–33
LIGGETT, THOMAS M. Two critical exponents for finite reversible nearest particle systems 714–725
LYNCH, JAMES. Some comments on the Erdős-Rényi law and a theorem of Shepp 801–802
LYONS, TERRY. A simple criterion for transience of a reversible Markov chain 393–402
MARCUS, MICHAEL B. AND GINÉ, EVARIST. The central limit theorem for stochastic integrals with respect to Lévy processes 58–77
MARSHALL, ALBERT W. AND OLKIN, INGRAM. Domains of attraction of multivariate extreme value distributions 168–177
MASON, J. DAVID, VEEH, JERRY ALAN, AND HUDSON, WILLIAM N. The domain of normal attraction of an operator-stable law 178–184
MAULDIN, R. DANIEL, PREISS, DAVID AND WEIZSÄCKER, HEINRICH. v. Orthogonal transition kernels 970–988
MITOMA, ITARU. Tightness of probabilities on $C([0,1]; \mathscr{S}')$ and $D([0,1]; \mathscr{S}')$ 989–999
MITRO, JOANNA B. An application of time reversal to Brownian local time 225–226
MONRAD, DITLEV AND JAIN, NARESH C. Gaussian measures in B_p 46–57
MÓRICZ, FERENC. On the Cesàro means of orthogonal sequences of

random variables 827–832
MUELLER, C. AND GOLDBERG, S. I. Brownian motion, geometry and generalizations of Picard's little theorem 833–846
NEMETZ, T. AND KUSOLITSCH, N. A method of investigating the longest paths in certain random graphs 217–221
NEY, PETER. Dominating points and the asymptotics of large deviations for random walk on R_d 158–167
OLKIN, INGRAM AND MARSHALL, ALBERT W. Domains of attraction of multivariate extreme value distributions 168–177
PERKINS, EDWIN AND GREENWOOD, PRISCILLA. A conditioned limit theorem for random walk and Brownian local time on square root boundaries 227–261
PERLMAN, MICHAEL D., PITT, LOREN D. AND JOAG-DEV, KUMAR D. Association of normal random variables and Slepian's inequality 451–455
PESTIEN, VICTOR C. AND HILL, THEODORE P. The advantage of using non-measurable stop rules 442–450
PINCUS, STEVE. A class of Bernoulli random matrices with continuous singular stationary measures 931–938
PITT, LOREN D., JOAG-DEV, KUMAR AND PERLMAN, MICHAEL D. Association of normal random variables and Slepian's inequality 451–455
PITTEL, BORIS. On the distributions related to transitive closures of random finite mappings 428–441
PREISS, DAVID, WEIZSÄCKER, HEINRICH V. AND MAULDIN, R. DANIEL. Orthogonal transition kernels 970–988
PRESUTTI, ERRICO AND SPOHN, HERBERT. Hydrodynamics of the voter model 867–875
PROSCHAN, FRANK AND BOLAND, PHILIP J. The reliability of k out of n systems 760–764
PRUITT, WILLIAM E. The class of limit laws for stochastically compact normed sums 962–969
PRUITT, WILLIAM E. AND TAYLOR, S. JAMES. The behavior of asymmetric Cauchy processes for large time 302–327
PURI, M. L. AND BHATTACHARYA, R. N. On the order of magnitude of cumulants of Von Mises functionals and related statistics 346–354
PURI, MADAN L. AND RALESCU, DAN A. Strong law of large numbers for Banach space valued random sets. 222–224
PURI, MADAN L. AND RALESCU, DAN A. Strong law of large numbers with respect to a set-valued probability measure 1051–1054
PYKE, RONALD AND GROENEBOOM, PIET. Asymptotic normality of statistics based on the convex minorants of empirical distribution functions 328–345
RALESCU, DAN A. AND PURI, MADAN L. Strong law of large numbers for Banach space valued random sets 222–224
RALESCU, DAN A. AND PURI, MADAN L. Strong law of large numbers with respect to a set-valued probability measure 1051–1054
RAMACHANDRAN, D. AND KALLIANPUR, G. On the splicing of

measures 819–822
REID, J. Estimate on moments of the solutions to stochastic differential equations in the plane 656–668
RÉVÉSZ, P., CSÁKI, E., CSÖRGŐ, M., AND FÖLDES, A. How big are the increments of the local time of a Wiener process? 593–608
ROSENKRANTZ, WALTER A. Calculation of the Laplace transform of the length of the busy period for the M | G | 1 queue via martingales 817–818
ROUSSEAU-EGELE, J. Un theoreme de la limite locale pour une classe de transformations dilatantes et monotones par morceaux 772–788
RUSSO, RALPH P. AND HANSON, D. L. Some more results on increments of the Wiener process 1009–1015
RUSSO, RALPH P. AND HANSON, D. L. Some results on increments of the Wiener process with applications to lag sums of I.I.D. random variables 609–623
SHAKED, MOSHE. Exponential life functions with NBU components . 752–759
SHIMURA, MICHIO. A class of conditional limit theorems related to ruin problem 40–45
SIEGRIST, KYLE. Harmonic functions and the Dirichlet problem for revival Markov processes 624–634
SILVERMAN, B. W. Convergence of a class of empirical distribution functions of dependent random variables 745–751
SPOHN, HERBERT AND PRESUTTI, ERRICO. Hydrodynamics of the voter model 867–875
STRICKER, C., YAN, J. A. AND EMERY, M. Valeurs prises par les martingales locales continues a un instant donné 635–641
TAYLOR, R. L. AND CALHOUN, C. A. On the almost sure convergence of randomly weighted sums of random elements 795–797
TAYLOR, S. JAMES AND PRUITT, WILLIAM E. The behavior of asymmetric Cauchy processes for large time 302–327
TEICHER, HENRY AND HAGWOOD, CHARLES. A multidimensional CLT for maxima of normed sums 1048–1050
TERRELL, GEORGE R. A characterization of rectangular distributions 823–826
VANDERBEI, R. J. AND LAWLER, G. F. Markov strategies for optimal control problems indexed by a partially ordered set 642–647
VEEH, JERRY ALAN, HUDSON, WILLIAM N. AND MASON, J. DAVID. The domain of normal attraction of an operator-stable law 178–184
WEIZSÄCKER, HEINRICH V., MAULDIN, R. DANIEL AND PREISS, DAVID. Orthogonal transition kernels 970–988
WOOD, THOMAS E. A Berry-Esseen theorem for associated random variables 1042–1047
YAN, J. A., EMERY, M. AND STRICKER, C. Valeurs prises par les martingales locales continues a un instant donné 635–641
ZACHARY, STAN. Countable state space Markov random fields and Markov chains on trees 894–903
ZAMAN, ARIF. Stationarity on finite strings and shift register sequences 678–684
ZINN, J. AND KUELBS, J. Some results on LIL behavior 506–557

Corrections and Notes

BROWN, MARK. Correction to "Approximating IMRL distributions, with applications to first passage times" 1055
ELLIS, RICHARD S. AND ROSEN, JAY S. Correction to "Laplace's method for Gaussian integrals with an application to statistical mechanics" 456
MITRA, S. S. Acknowledgment of priority 456
ROBINSON, J. Correction to "Large deviation probabilities for samples from a finite population" 1055
ROSEN, JAY S. AND ELLIS, RICHARD S. Correction to "Laplace's method for Gaussian integrals with an application to statistical mechanics" 456
